SUMMARY

AWS Cloud & DevOps Engineer transitioning from 9 years of Enterprise IT Operations and Production Support. Skilled in incident management, root cause analysis, technical leadership, and stakeholder communication for mission-critical enterprise applications. Hands-on with AWS, Linux, Docker, Kubernetes, Jenkins, Terraform, Git, and Ansible through multiple self-driven infrastructure projects. AWS Certified Solutions Architect – Associate and PMP Certified, with a practical foundation in automation and Infrastructure as Code (IaC).

CORE SKILLS

Cloud: AWS (EC2, VPC, RDS, S3, Lambda, API Gateway, DynamoDB, ECS, ECR, CodePipeline, CodeBuild)

IaC & Config Management: Terraform, Ansible

Containers & Orchestration: Docker, Kubernetes

CI/CD & Automation: Jenkins, GitHub Actions, Git/GitHub

Monitoring: Prometheus, Grafana

Operations: Linux, Incident Management, Root Cause Analysis, SLA Management, ServiceNow

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate — Amazon Web Services (Aug 2026)
- GitHub Actions — GitHub (Sep 2026)
- PMP – Project Management Professional — PMI (2025)
- Professional Certificate in Cloud Computing & DevOps — E&ICT Academy, IIT Guwahati, in partnership with Simplilearn (Nov 2025 – Jun 2026)
- Introduction to Generative AI: Art of the Possible — AWS Training & Certification (Oct 2025)
- SQL Essential Training — LinkedIn Learning (Jul 2025)

In Progress: HashiCorp Certified Terraform Associate (004)

PROFESSIONAL EXPERIENCE

Technical Operations Team Lead

May 2021 – Present

UPS Logistics → Tech Mahindra (process outsourced), Pune, India

- Led technical support operations for mission-critical enterprise shipping applications serving global customers.
- Served as the primary escalation point for complex production incidents requiring cross-functional collaboration.
- Coordinated with L2, L3, QA, and engineering teams to troubleshoot application issues and support timely resolution.
- Performed root cause analysis on recurring issues and contributed to operational process improvements.
- Managed SLA compliance, knowledge documentation, and technical mentoring for an 18-person support team.
- Led training initiatives and knowledge transfer sessions to improve troubleshooting efficiency and operational readiness.

Senior Customer Support Officer

Oct 2019 – Jan 2021

Mphasis, Pune, India

- Provided expert-level technical support for a Sweden-based banking client.
- Collaborated with cross-functional teams to resolve escalated issues while meeting SLA and KPI targets.

System Analyst

Feb 2019 – Sep 2019

Collabera Technologies, Pune, India

- Acted as Subject Matter Expert and 2nd-level support escalation point for Amdocs' Order Management product.
- Conducted root cause analysis on technical issues and contributed to training materials and knowledge base articles.

Senior Associate

Jan 2016 – Jan 2019

WNS Global Service, Pune, India

- Delivered chat and voice-based technical and billing support for a UK-based enterprise client.
- Consistently met quality and performance metrics while contributing to process improvement initiatives.

CLOUD & DEVOPS PROJECTS

AWS 3-Tier Architecture with Monitoring

Designed and deployed a production-grade 3-tier architecture on AWS — custom VPC across multiple AZs, EC2 instances running Tomcat, RDS MariaDB, Application Load Balancer, and Auto Scaling Group. Instrumented with Prometheus and Grafana for real-time monitoring.

Multi-Node Kubernetes Cluster Deployment

Built a self-managed Kubernetes cluster across three EC2 instances (Master, Worker, and a dedicated NFS server). Deployed a MySQL + WordPress stack with NFS-backed persistent storage and the Kubernetes Dashboard.

Infrastructure Automation with Terraform & Ansible

Provisioned AWS infrastructure with Terraform and automated application deployment with Ansible — including SSH key management, playbook-driven configuration, and Tomcat/MySQL deployment.

Ansible-Automated Nginx Deployment

Automated Nginx web server deployment using Ansible playbooks and Jinja2 templates, driven from a control node to a remote node via a dynamic inventory.

Dockerized 3-Tier Application

Containerized a full 3-tier application (React/Vite frontend, Node.js/Express backend, MySQL, Redis cache) and orchestrated it with Docker Compose on an EC2 instance, including multi-stage Docker builds.

EDUCATION

Bachelor of Commerce (B.Com) — Poona College of Arts, Science & Commerce, Pune, 2016
